# Getting started with Claude

## How to talk to Claude: Prompting formula

### Prompt 1

Write a five-paragraph email to introduce a new productivity app to small business owners, focusing on its time-saving features.

### Prompt 2

What steps should I follow to create a compelling LinkedIn profile?

### Prompt 3

How do I structure a business plan for a startup idea?

### Prompt 4

Create a 7-slide presentation on the topic of personal branding. Include what it is, why it matters, key components, and steps to develop your brand.

### Prompt 5

Act as a seasoned executive assistant with over 15 years of experience managing high-level business correspondence.

Explain how to write a compelling email in 5 easy steps. The instructions should cover crafting an engaging subject line, structuring the email clearly, and using a professional tone. Make the process simple enough for anyone to follow, even without prior experience in formal writing.

Use a conversational tone that balances professionalism with accessibility.

Keep each step explanation between 2-4 sentences; Provide at least one "do" and one "don't" example for each step; Incorporate formatting tips (spacing, paragraphs, bullet points); Avoid technical jargon or complex business terminology.

### Prompt 6

As a senior executive assistant with 15+ years of experience managing high-level business correspondence, create a guide for software engineers and other technical people looking to improve their business email communication skills.

Explain how to write a compelling email in 5 easy steps. The instructions should cover crafting an engaging subject line, structuring the email clearly, and using a professional tone. Make the process simple enough for anyone to follow, even without prior experience in formal writing.

Use a conversational tone that balances professionalism with accessibility.

Keep each step explanation between 2-4 sentences; Provide at least one "do" and one "don't" example for each step; Incorporate formatting tips (spacing, paragraphs, bullet points); Avoid technical jargon or complex business terminology.

## **Building on Claude's responses: Iterative prompting**

### **Prompt 1**

Create an outline for a business proposal for a mobile dog grooming service.

### **Prompt 2**

Take the outline you created and expand the market analysis section. Focus on demographic data and competition in urban areas.

### **Prompt 3**

Now, develop the financial projections section. Include startup costs, monthly operating expenses, and revenue forecasts for the first year.

### **Prompt 4**

Remember the marketing strategy we discussed earlier? Let's build on that but focus on suburban families in areas with limited grooming options.

### **Prompt 5**

Review the entire proposal and enhance the executive summary to highlight our unique value proposition and market opportunity.

# Making Claude work best for you: Profile preferences and conversation styles

*Anna's Claude.ai profile preferences demonstrated in the lecture (copy and paste to your profile and modify to fit your preferences):*

I'm a product builder and online instructor. I frequently create educational content and lecture scripts on software product management, AI, and generative AI. My target audience typically includes business professionals, product managers, and non-technical stakeholders who need to understand AI and product management fundamentals.

I prefer:

- Breaking down complex technical concepts into simple, understandable language
- Using real-world examples and case studies to explain abstract concepts
- Focusing on practical applications rather than theoretical details
- Creating content suitable for beginners with no prior technical background
- Using analogies and visual explanations when possible
- Avoiding technical jargon unless absolutely necessary
- Incorporating interactive elements and discussion points
- Structuring content in a logical, step-by-step manner
- Relating AI concepts to everyday experiences my students can understand

## Follow-along: Brainstorming with Claude

### Prompt 1

Give me some ideas for a side hustle project.

### Prompt 2

I'd like to come up with an idea for my side hustle project. I'd like this side hustle to be related to my core professional expertise—software product management. I can invest five to ten hours per week in this project. I'd like it to generate at least \$500 USD per month in income.

Can you help me brainstorm by:

Suggesting 10 ideas for a side hustle project I can run

Indicating the steps required to execute the project

Suggesting monetization strategies for each project

### Prompt 3

You are an expert in brainstorming techniques with over 15 years of experience. I'd like to come up with an idea for my side hustle project. I'd like this side hustle to be related to my core

professional expertise—software product management. I can invest five to ten hours per week in this project. I'd like it to generate at least \$500 USD per month in income.

Can you help me brainstorm by:

Suggesting 10 ideas for a side hustle project I can run

Indicating the steps required to execute the project

Suggesting monetization strategies for each project

## Prompt 4

You are the world's leading expert in whatever I am about to ask you about. I'd like to come up with an idea for my side hustle project. I'd like this side hustle to be related to my core professional expertise—software product management. I can invest five to ten hours per week in this project. I'd like it to generate at least \$500 USD per month in income.

Can you help me brainstorm by:

Suggesting 10 ideas for a side hustle project I can run

Indicating the steps required to execute the project

Suggesting monetization strategies for each project

## Prompt 5 (not demonstrated, but worth trying)

'Product Management Templates & Frameworks Marketplace' sounds interesting, and I'd like to build a minimum viable product for this idea. Please suggest popular PM templates and frameworks I can include in the MVP of the marketplace.

## Prompt 6 (not demonstrated, but worth trying)

I'd like to explore which audience might be interested in the 'Product Management Templates & Frameworks Marketplace'. Can you please suggest user groups for me and explain what value the marketplace can bring to them?

# Follow-along: Ask Claude to improve your prompt

## Prompt 1

Can you help me to improve this prompt:

"You are the world's leading expert in whatever I am about to ask you about. I'd like to come up with an idea for my side hustle project. I'd like this side hustle to be related to my core professional expertise—software product management. I can invest five to ten hours per week in this project. I'd like it to generate at least \$500 USD per month in income."

Can you help me brainstorm by:  
Suggesting 10 ideas for a side hustle project I can run  
Indicating the steps required to execute the project  
Suggesting monetization strategies for each project”

## Prompt 2

For the three ideas above, please provide the information on potential challenges and risks and how to address them.

## Prompt 3 (improved)

As an expert in software product management and entrepreneurship, help me identify viable side hustle opportunities that leverage my product management expertise. I'm looking for opportunities that:

Requirements:

- Time commitment: 5-10 hours per week
- Target monthly income: \$500+ USD
- Leverages product management skills and experience
- Can be started and managed alongside a full-time job

Please analyze and provide:

1. 3-4 detailed side hustle opportunities, ranked by:

- Time to first revenue
- Initial investment needed
- Income potential
- Scalability
- Market demand/competition

2. For each opportunity, include:

- Specific target audience and their pain points
- Required skills and tools
- Step-by-step implementation plan for the first 90 days
- Potential challenges and risks and how to address them
- Monetization strategy with pricing examples
- Marketing channels and customer acquisition approach

Please focus on opportunities that have proven successful for other product managers and provide real-world examples where possible.

## How to share content with Claude

### Prompt 1

Can you analyze the sales data in this file and tell me the top-performing months?

### Prompt 2

Could you summarize the main points from pages 3–5 of this PDF?

### Prompt 3

Please compare the first quarter sales in `sales_2023.csv` with those in `sales_2024.csv`.

### Prompt 4

I have uploaded three related files: *specifications.doc*, *implementation.pdf*, and *testing\_results.csv*. Please help me analyze them in this order:

1. First, read the requirements from *specifications.doc*.
2. Then, check if these requirements are met in *implementation.pdf*.
3. Finally, list any discrepancies in comparison with *testing\_results.csv*.

## Using examples when prompting

### Prompt 1

I need help writing customer service responses.

Here's an example of the style I want:

Customer: "My delivery is 2 days late and no one is updating me!"

Response: "Hi Sarah, I hear your frustration about the delayed delivery. I've checked your order #1234 and see it's currently in transit. I'm escalating this to our shipping team for immediate attention. To make this right, I've added express shipping to your next order free of charge. I'll send you tracking updates every 4 hours until delivery. Would that help?"

Now, please help me respond to this customer:

Customer: "I tried to return my item a week ago but haven't received my refund yet."

### Prompt 2

I need to write meeting summaries. Here are two examples of the format I want:

Meeting: Q1 Planning Key Decisions:

- Budget increased by 15% for digital marketing
- New hire approved for design team
- Action Items:
- John: Draft marketing plan by Friday
- Sarah: Schedule design team interviews
- Follow-up: Next review on Jan 15

Meeting: Product Launch Key Decisions:

- Launch date set for March 1st
- Pricing confirmed at \$99/month
- Action Items:
- Mike: Finalize press release
- Lisa: Complete beta testing
- Follow-up: Daily standups start Feb 15

Now, please help me summarize this meeting:

"We just finished our customer feedback session where we decided to prioritize mobile app development, allocated \$50K budget, and agreed to hire two developers. Tom will write the job descriptions, and Alice will set up the project in Jira. We'll review progress next month."

### Prompt 3

I need help handling sales objections. Here are two examples of effective responses:

**Objection:** "Your software is too expensive"

**Response:** "I understand price is a key consideration. Based on our data, companies typically see a 300% ROI within 6 months through reduced manual work. Would it be helpful to see a detailed breakdown of how these savings would apply to your team?"

**Objection:** "We're already using a competitor"

**Response:** "That's great that you're already seeing the value in this type of solution. Many of our current clients switched from that provider because of our unique inventory forecasting feature. Would you be interested in seeing how this could reduce your stockouts by 40%?"

Using these examples as a guide, how would you help me respond to:

**Objection:** "We need to wait until next quarter"

## Prompt 4

Please provide your feedback on the email writing guide below, including suggestions for how it can be improved:

### How to Write a Compelling Email in 5 Easy Steps

#### Step 1: Craft an Attention-Grabbing Subject Line

Keep your subject line clear, specific, and under 50 characters. Make it relevant to your message and compelling enough to stand out in a crowded inbox.

✓ DO: "Meeting Request: Q2 Strategy Discussion - Tuesday"

✗ DON'T: "Important!!!" or "Follow-up on our conversation yesterday"

#### Step 2: Start With a Friendly, Personalized Greeting

Address the recipient by name and include a brief pleasantry to establish rapport. Keep this section concise while making the recipient feel valued and recognized.

✓ DO: "Hi Sarah, Hope you're having a great week!"

✗ DON'T: "To whom it may concern:" or jumping straight into your request without a greeting

#### Step 3: Structure Your Main Message with Clarity

Present your key points in short paragraphs with adequate spacing between them. Start with your main purpose in the first 1-2 sentences, then support with necessary details.

✓ DO: "I'm writing to request your feedback on the attached proposal before our Friday meeting. Your insights on sections 2 and 3 would be especially valuable."

✗ DON'T: "I was thinking that maybe, if you have time, you might want to look at this thing I worked on, because it would be really nice to get some thoughts from someone with your experience..."

#### Step 4: Include a Clear Call to Action

Tell your recipient exactly what you want them to do and by when. Make this stand out visually, either in its own paragraph or bolded for emphasis.

✓ DO: "Could you please review the document and send your comments by Thursday at 3 PM?"

✗ DON'T: "Let me know what you think whenever you get a chance."

## Step 5: End With a Professional Closing

Wrap up with a brief, friendly closing that includes your name and relevant contact information. Express gratitude and maintain a positive, professional tone.

✅ DO: "Thanks for your help! Looking forward to your response."

❌ DON'T: "Anyway... let me know. Thx."

## Prompt 5:

Here is an updated version of the email writing guide with the changes I made based on your aforementioned suggestions. Can you please review the updated version and let me know if there is anything else I can do to improve the document?

## Output formatting

### Prompt 1

Write a concise and well-structured document analyzing the future of work, including key findings, data insights, and actionable recommendations. The report should include an executive summary, background/context, analysis, and a conclusion with next steps.

Please format this as a professional report with headers, subheaders, and short, clear paragraphs.

### Prompt 2

Based on the provided data tables, write a report analyzing three competing products in the online collaboration software industry. Use the data to compare their performance, features, pricing, customer feedback, and market positioning.

Present the comparison of these three products in a clear table format with features in the left column.

### Prompt 3

Write a business report comparing three leading products in the digital marketing tools category. Include sections on features, pricing, target audience, and unique selling points.

Use bold text to highlight key takeaways and italics for important terms or industry-specific language.

Present the comparison in a clear table format, with features listed in the left column.

## Prompt 4

Write a short guide offering practical tips for improving productivity while working remotely. Focus on daily habits, workspace setup, and communication practices. Could you organize these tips using bullet points? Something like:

- Main tip
  - Supporting detail
  - Another detail

## Follow-along: Creating marketing campaign emails (part 1) and (part 2)

Slide Symphony product details are described [here](#).

### Prompt 1.1

I'd like to get your feedback on the email pitch for my new product. The problem I'm currently facing is that almost no one is clicking on the website link (included in the email) or requesting a trial of my product. I'd appreciate your opinion on possible issues with my current email pitch. I'll submit the pitch text, and you can provide your feedback. Please note that, for privacy reasons, I've removed the website link from the pitch, but it is included in the original email. Is this okay with you?

### Prompt 1.2

Subject: Try Slide Symphony - A New Way to Create Presentations

Dear [Name],

I'm Michael Chen, one of the engineers who developed Slide Symphony, and I wanted to share with you how our presentation generation system works and why we built it this way.

Our software uses advanced text analysis to understand your documents and convert them into presentations. We spent two years developing a system that can:

1. Read through your documents and identify the most important points (using the same technology that powers modern search engines)
2. Understand document structure and turn it into a logical presentation flow
3. Generate appropriate visuals and choose layouts that best fit your content

The technical process looks like this:

- First, the system analyzes your document's structure

- Then it extracts key information using our content processing engine
- Finally, it applies design rules to create visually appealing slides

During the 30-day trial, you'll get access to:

- Document-to-presentation conversion
- Real-time collaboration features
- Custom design settings
- Design template library
- Export to PowerPoint format

System notes:

- Works in any modern web browser
- Process takes about 2-3 seconds per slide
- Supports documents up to 100 pages
- Internet connection required

To start using the system:

1. Create an account on our website
2. Upload your document
3. Wait for processing (usually takes a few seconds)
4. Review and edit the generated presentation

[Start Trial]

You can find detailed instructions in our user guide. Our support team is available to help with any questions.

Best regards,  
Michael Chen  
Software Engineer  
Narrative Systems

P.S. We also have a detailed guide on how the system processes different types of documents  
[Link to guide]

Prompt 3

Yes, please provide a revised version of the email incorporating these improvements.

Prompt 4

Good—the revised email looks awesome. Please create the extended marketing package. I'd like to have several options for an email sequence (three emails each) that I can A/B test to see what works best.

OR:

The revised email doesn't look quite right—I'm actually looking for a technical accuracy review more than marketing effectiveness," this would completely reshape Claude's approach to reviewing your email.

## Prompt 5

These sequences look interesting. I was thinking about sending the main offer first and then following up with two additional emails explaining to potential customers why they should take the offer, in case they didn't reply right away. Please make changes to sequences A, B, and C accordingly.

## Prompt 6

Please create a second variation of this direct offer sequence.

## Prompt 7.1

I rewrote some of my emails and now want your feedback on these new versions. Are you fine with this?

## Prompt 7.2

Hi [Name],

Late nights. Missed deadlines. The dreaded "urgent presentation request." We've all been there – spending hours copying, pasting, and reformatting documents into slides, while other critical work piles up.

What if you could:

- \* Turn any document into a presentation instantly – just upload your file and watch as AI transforms it into beautifully designed slides
- \* Never manually format another slide – our smart templates automatically adjust your content for perfect visual balance and brand consistency
- \* Create perfect presentations in your sleep – schedule automatic conversions to wake up to presentation-ready decks

Slide Symphony makes it possible. Our AI-powered platform has already helped over 10,000 professionals reclaim their evenings and deliver stunning presentations on time, every time.

Stop letting presentation design eat up your valuable time. Join industry leaders from Google, Microsoft, and Adobe who trust Slide Symphony to transform their workflow.

[Reclaim Your Time - Start Free Trial]

P.S. Try it now and get our premium template pack (\$99 value) free for your first month.

## Prompt 8

Great work! Now I need help creating a second email in the sequence. I'll provide you with the information on what I'd expect to see in the email, and you will write it for me. Are you okay with that?

## Prompt 9

Good. Now I want you to create a third email for the marketing email sequence. As you remember, you already helped me create the first and second emails in the sequence. I'll provide more details on what I'd like to include in the third email. Are you fine with this?

## Prompt 10

So, the third email will be the last one in the sequence and the final opportunity to offer my prospective customers a chance to try the product. I'd like to focus on covering client testimonials in the third email. Please create two email variations.

Here are those testimonials:

"Slide Symphony has transformed how our consulting team operates. What used to take us 4-5 hours now takes less than an hour, and the quality is consistently excellent. It's like having a professional presentation designer on call 24/7."

- Sarah Martinez, Senior Partner, BlueRock Consulting

"The platform's ability to understand financial terminology and create appropriate visualizations is remarkable. We've been able to reduce our presentation preparation time by 70% while maintaining the high standards our clients expect."

- James Chen, VP of Investment Banking, Apex Capital Partners

"As a sales team leader, I've seen our presentation creation process become significantly more efficient. The consistent branding and quick iteration capabilities have helped us close deals faster than ever before."

- Michael O'Brien, Global Sales Director, CloudSphere Technologies

"The AI's understanding of technical content is impressive. It creates perfect slides from our complex research documents, maintaining accuracy while making the information accessible to various audiences."

- Dr. Emily Wong, Technical Director, Quantum Dynamics Research

"We rolled out Slide Symphony across our marketing department six months ago, and the results have been outstanding. Our team can now focus on strategy rather than spending hours formatting slides."

- Rachel Thompson, CMO, Nova Digital Solutions

### Prompt 11.1

Can you suggest five alternatives for my email subject line? I will submit an email text, and you will create five subject lines that are catchy, grab attention, and nudge the recipient to open the email. Are you okay with this?

### Prompt 11.2

*You copy-paste email text generated by Claude*

### Prompt 12

Can you please generate another 10 subject line alternatives?

*And if we don't like these alternatives either, we can ask something like:*

Let's generate another 10 variants, please. State just the subject lines, without any additional description.

### Prompt 13: continue iterating on subject lines, if necessary:

Let's generate another 10 variations with an emphasis on quality.

OR

I don't particularly like any of these variations. Can you suggest another set of 10?

OR:

I'm inclined toward this subject line: [insert subject line]. Can you suggest its variations?

# Understanding Claude's Artifacts and Projects

## Artifacts: Definition and how Claude uses them

### Prompt 1

I need help researching secondary schools and renting options in Melbourne, Australia.

I need the following information—for every school, provide the name of the district where it's located, and the minimum and average renting prices for a house with 3-4 bedrooms and 2 bathrooms.

I also submitted a list of schools as a file attachment.

### Prompt 2

Great! Yes, I like to get some additional details about each school: Typical commute times to CBD, School zone boundaries, local amenities, if there is a park nearby.

### Prompt 3

## How to maximize your usage limits using artifacts

### Prompt 1

I'd like to rank the schools based on the following criteria: schools that are known for their achievements in math and science.

## Follow-along: Creating visuals with Claude – process flow diagram (part 1)

Mosaic Mind company description is available via the [link](#).

### Prompt 1

Please create a new employee onboarding process flow for Mosaic Mind startup.

### Prompt 2

Make modifications in the Pre-onboarding phase. It must consist of three steps only: Ship home office equipment, Grant access to Notion documentation, and Send welcome email with setup instructions.

### Prompt 3

For the “First day” step, move “Assign Onboarding Buddy” under “Virtual office Introduction”. Change “First Month Milestones” to “First Month: Deep integration”.

### Prompt 4

Great. Now add a decision point after the "First Month: Deep Integration" step is completed.

Include the text "30 Days Review" as the decision point description. If the review process is satisfactory, add a step called "Complete Onboarding," which is the final step of the process flow. If a new employee's training needs improvement, add a step called "Develop Improvement Plan," followed by "Additional Training."

Once additional training is completed, the 30 Days Review must be repeated. Change the color of all the key components of the onboarding process, except for the “30 Days Review” decision point, to yellow.

## **Follow-along: Creating visuals with Claude – process flow diagram (part 2)**

### Prompt 1

Can you create a template for the 30-Day Review process for Mosaic Mind?

## **Publishing and remixing artifacts**

### Prompt 1

Let's add Next Piece Queue and Hold Piece, please: A queue feature allows showing the next 3–4 pieces coming up. A "hold" feature allows players to store one piece for later use (activated with a key like Space).

### Prompt 2

The Queue System doesn't seem to be working as I don't see any blocks there. Can you please check and fix it?

# Skills: Teaching Claude to Work Your Way

## Working with Built-in Skills: Creating Documents

StudyBuddy AI - Product Brief & Q1 Roadmap is available via the [link](#).

### Prompt 1:

Based on the StudyBuddy AI product brief I uploaded, create a professional press release Word document (.docx file) announcing our product launch.

The press release should include:

- Compelling headline
- Date and location (Melbourne, Australia)
- Opening paragraph with key news
- Product overview and key features
- Quote from CEO/Founder
- Availability and pricing information
- About StudyBuddy AI (boilerplate)
- Media contact information

Use proper press release formatting with standard structure and professional tone. Create an actual downloadable Word document.

## Creating Polished PDFs with Built-in Skills

### Prompt 1

Create a professional PDF final report: "StudyBuddy AI - Beta Testing Results & Insights"

Based on this data:

- Beta period: November 2025 - December 2025

- Participants: 500 students across 3 universities
- Key metrics: 85% daily active users, 4.8 star rating, 78% said it improved their productivity
- Most used features: Smart deadline tracking (95%), AI study planner (82%), Collaboration tools (67%)
- Key feedback: "Game changer for managing multiple courses" (positive), "Needs mobile app" (improvement needed)
- Technical performance: 99.2% uptime, average response time 1.2 seconds

Include:

- Professional cover page with title and date
- Executive summary (1 paragraph)
- Methodology section
- Key findings with metrics
- User feedback highlights (formatted nicely)
- Recommendations for Q1 launch
- Appendix with detailed statistics table
- Page numbers and headers on each page

## Creating Visual Content with Example Skills

### Prompt 1

Create a poster announcing "24-Hour Innovation Hackathon" with \$5000 in prizes

### Prompt 2

Create a minimalist poster for "24-Hour Innovation Hackathon" with \$5000 in prizes

### Prompt 3

Create a bold, energetic poster for "24-Hour Innovation Hackathon" with \$5000 in prizes

## Creating Custom Brand Themes by Extending Existing Skills

StudyBuddy AI - Product Brief & Q1 Roadmap is available via the [link](#).

### Prompt 1

I've uploaded a product brief for StudyBuddy AI.

Please read it and create a professional PowerPoint presentation titled "StudyBuddy AI - Q1 2026 Product Roadmap" with exactly 5 slides:

Slide 1: Title slide

Slide 2: Product Overview (what StudyBuddy is and the problem it solves)  
Slide 3: Q1 Feature Priorities (the main features launching in Q1)  
Slide 4: Timeline (January, February, March milestones)  
Slide 5: Success Metrics (user growth, engagement, quality, partnerships)  
Make it clear and professional. No specific theme yet - we'll apply that next.

## Prompt 2

Show me the theme showcase from the theme-factory skill so I can see all available themes.

## Prompt 3

Apply the "Tech Innovation" theme to my StudyBuddy AI roadmap presentation.

## Prompt 4

Create a custom theme for this StudyBuddy AI presentation with these brand requirements:

- Primary color: Vibrant Purple #8B5CF6 (represents learning and creativity)
- Secondary color: Bright Teal #14B8A6 (represents clarity and focus)
- Accent color: Warm Coral #F97316 (for call-to-action elements)
- Modern, student-friendly, energetic feel
- Target audience: university students and education decision-makers

Show me the theme details first, then apply it.

## Prompt 5

Great! Can I now save this skill of creating a presentation with my custom theme? so that I can use that skill for future projects?

## Prompt 6

Create a one-page PDF document: "StudyBuddy AI - Feature Specification: Smart Deadline Management"

Include:

- Feature overview
- User stories
- Technical requirements
- Success criteria

Apply my studybuddy-brand theme to this document.

## Prompt 7

List my custom skills.

# Creating Custom Skills with Written Instructions

## Prompt 1

Skill Name: LinkedIn Personal Brand Voice

Skill Description: Apply my personal brand voice to all LinkedIn content

Instructions:

When I ask you to create LinkedIn posts, always follow these rules:

TONE:

- Professional but conversational
- Enthusiastic without being overly promotional
- Use "I" and "you" to create connection
- Avoid corporate jargon

STRUCTURE:

- Start with a hook question or bold statement
- Keep paragraphs to 2-3 lines maximum
- Use line breaks for readability
- End with a clear call-to-action or question

LENGTH:

- Aim for 150-200 words
- Never exceed 250 words

STYLE:

- Use emojis sparingly (max 2 per post)
- Include relevant hashtags (3-5 maximum)
- Write in active voice
- Break up text with single-line statements for emphasis

DO NOT:

- Use buzzwords like "synergy," "disrupt," "game-changer", "uncomfortable truth", and similar
- Write in all caps
- Use excessive exclamation marks
- Create clickbait-style hooks

## Prompt 2 (without LinkedIn Personal Brand Voice skill)

Write a LinkedIn post about the importance of continuous learning in the tech industry.

## Prompt 3 (with LinkedIn Personal Brand Voice skill activated)

Write a LinkedIn post about the importance of continuous learning in the tech industry.

# Building Complex Skills with Claude (part 1) and (part 2)

## Prompt 1

I want to create a skill for generating professional case study presentations.

Here's what I need:

**PURPOSE:** Create visually appealing case studies for past client projects to showcase on my LinkedIn Featured section

**VISUAL STYLE:** Clean, modern, design-agency quality - think bright, sophisticated presentations you'd see from a creative studio or fashion brand

**STRUCTURE:** Each case study should include:

- Project title slide with client name and project type
- Situation (before) - project challenge/problem statement
- Solution/Approach (what we did)
- Outcomes/Impact (with metrics if available)

**BRANDING:** I want to upload my custom fonts and a color theme template

**OUTPUT:** Generate ready-to-use .pptx files

Can you help me create this skill?

## Prompt 2

I have custom brand fonts I'd like to use in all presentations. Can I upload these as part of the skill?

## Prompt 3

Create a case study presentation for the following project:

CLIENT: TechStart Innovations  
PROJECT TYPE: Mobile App Development  
DURATION: 6 months

#### CHALLENGE:

TechStart needed a patient-facing mobile app for their telemedicine platform. Their existing web-only solution had low engagement, and patients wanted the convenience of mobile access. They had 3 months to launch before their major funding round.

#### SOLUTION:

We developed a React Native app with:

- Seamless video consultation integration
- In-app prescription management
- Appointment scheduling with calendar sync
- Push notifications for appointment reminders
- Secure patient health record access

#### RESULTS:

- Launched 2 weeks ahead of schedule
- 15,000 downloads in first month
- 78% user retention rate after 3 months
- 4.8 star rating on App Store
- Successfully secured \$5M Series A funding

#### KEY LEARNINGS:

- Early user testing revealed need for offline mode
- Simplifying onboarding from 5 steps to 3 increased completion rate by 40%
- Push notifications were critical for engagement

## Prompt 4

I've uploaded a presentation that I love the design of. I want to create a custom skill that generates presentations with a similar aesthetic, but I need help articulating the design principles.

Please analyze this presentation and describe:

1. Typography style and hierarchy (font sizes, weights, spacing)
2. Color palette and how colors are used
3. Layout principles (spacing, alignment, white space)
4. Overall visual aesthetic in designer language
5. What makes this design feel modern and professional

Format your response as instructions I can include in a skill's SKILL.md file.

## Prompt 5

I want to update this skill with more detailed design instructions. I analyzed a presentation I love and got these design principles. Please add a new section called 'Visual Design Requirements' to the SKILL.md file with the following:

Also, I'm going to upload a presentation file to Resources as visual inspiration. Please add an instruction at the beginning that says: 'A presentation file is included in Resources as visual inspiration. Reference it for overall aesthetic feel, but build all slides from scratch following the design principles below.'

## Prompt 6

Create a case study presentation for the following project:

CLIENT: TechStart Innovations PROJECT TYPE: Mobile App Development

CHALLENGE: TechStart needed a patient-facing mobile app for their telemedicine platform. Their existing web-only solution had low engagement, and patients wanted mobile access. They had 3 months to launch before their major funding round.

SOLUTION: We developed a React Native app with seamless video consultation, in-app prescription management, appointment scheduling, and secure health record access.

RESULTS:

- Launched 2 weeks ahead of schedule
- 15,000 downloads in first month
- 78% user retention after 3 months
- 4.8 star App Store rating
- Secured \$5M Series A funding

# Claude Cowork: Your AI Agent for Everything Beyond Chat

## Follow-along: Your First Cowork Task — Organize Your Downloads Folder

### Prompt 1

Suggest a system for how I can organize my Downloads so that they don't pile up every month. Then, organize the existing files accordingly.

## Follow-along: Cowork Proofreads and Edits Your Files — Instructions in Action

### Prompt 1

I have a set of VTT caption files in this folder. These captions were created by human transcribers for my online course about Claude AI.

Please review all VTT files for grammar mistakes. Pay close attention to AI-related terminology — including product names, company names, and technical terms — to make sure they are spelled and used correctly throughout.

Review all files before presenting the results. Do not summarise — list every issue you find.

## Follow-along (part 1): When the Connector Fails and the Browser Steps In

### Prompt 1

I need you to process all lecture scripts in this Google Drive folder:

[https://docs.google.com/spreadsheets/d/1N7poiW0JSrFM9NmvpU\\_VOwcFocX8SIjTfae3z0d0hg/edit?usp=sharing](https://docs.google.com/spreadsheets/d/1N7poiW0JSrFM9NmvpU_VOwcFocX8SIjTfae3z0d0hg/edit?usp=sharing)

For each script, do the following two steps:

Step 1 — Create a bullet point summary of the lecture. The summary should contain only key points actually covered in the lecture. Each bullet point must be exactly one sentence long. Keep the language simple and beginner-friendly. Save the bullet points as a temporary working note — you'll use them in Step 2.

Step 2 — Open Gamma app at [gamma.app](https://gamma.app). Find my existing file called "Lecture recap template" in my Gamma workspace. Study its slide structure, layout, and formatting style carefully. Then create a brand new Gamma presentation for this lecture, following the exact same format as that file, using the bullet points you generated in Step 1 as the slide content. Title the new presentation with the lecture name.

Repeat both steps for every script in the folder, one lecture at a time. When all lectures are done, give me a summary list of all the Gamma presentations you created with their titles.

## **Follow-along (part 1): Building a Dashboard, Task Queuing, and Parallel Work**

### **Prompt 1**

Reva AI is an AI phone receptionist for small service businesses — dental offices, restaurants, home services, fitness studios, cleaning companies. It answers calls, books appointments, and captures leads when staff can't pick up. I'm on the Customer Success team and I want to understand what our customers think.

Read the Reva AI survey responses from my Google Drive. Identify the main themes in the feedback, assess overall sentiment, and rank the most-requested improvements by how often they come up. Break the sentiment down by plan tier and by industry. Then build me an interactive dashboard summarizing the insights, and finish with a short "what to do next" section that prioritizes the top three fixes.

### **Prompt 2**

Once that's done, look through my recent emails and find any that look like customer feedback about Reva AI — based on what I told you Reva does. Read the ones you find, fold them into the analysis, and tell me where the emails confirm what the survey said and where they raise something new. Then update the dashboard with that comparison.

## **Follow-along (part 2): Let the Skill Do the Styling, Then Write the Notion Brief**

### **Prompt 1**

Use the theme-factory skill on this dashboard. Show me the theme showcase first so I can pick the right one for an AI receptionist product targeting small service businesses.

### **Prompt 2**

Apply the Tech Innovation theme to the dashboard. Save it as a new version so I keep the original.

### Prompt 3

Using the survey analysis and the customer emails, write a Customer Feedback Review Brief that our Customer Success team will use in our internal review meeting.

Structure it like this. Start with a two-sentence TL;DR — what's the overall picture this quarter. Then a "Themes" table with three columns: theme, how often it came up, and which customer segment is most affected. Then a short "Segments to watch" section flagging any tier or industry where satisfaction is notably lower than the overall average — describe the pattern, don't recommend a fix. Then a "Customer voice" section with two or three short representative quotes for each major theme. Close with a "For discussion" section that lists the open themes, framed as questions for the team — not recommendations. For example: "How should we weight the multi-location pricing signal?" — not "We should fix multi-location pricing."

Important: do not propose solutions, priorities, or recommendations in this brief. That's our team's job in the review meeting. Stick to describing the findings and surfacing what's there to discuss.

Then create a new page in Anna HQ Notion workspace, titled "Q3 Customer Feedback Review Brief", including a link to the full dashboard.

## Follow-along (part 3): Posting to Slack and Creating a Skill Inside Cowork

### Prompt 1

Post a handoff message to the #cs-product-requests channel in Slack, addressed to the Product team. Use this structure:

One opening line summarizing what we're sending over — what quarter this is, what's the source, why we're flagging it now.

Then a numbered list of three action items, in this order: Spanish language support, two-way calendar sync, multi-location pricing review. For each, give one short line of context tied to the customer evidence — what segment is asking, how often, and any sharp quote that lands the point.

Close with one line pointing to the full review brief in Notion (link the page) and one line inviting Product to flag questions in-thread.

Keep the whole thing scannable — this is a Slack message, not a document. Short lines, no walls of text.

## Prompt 2

Based on how we wrote the Customer Feedback Review Brief in this conversation — the structure, the tone, the rules I gave you about not proposing solutions and framing the open themes as questions for the team — write me a reusable skill called "Reva CS Review Brief." Capture the structure, the tone rules, and the judgment rules. Also include a short description of what Reva AI is — an AI phone receptionist for small service businesses like dental offices, restaurants, home services, fitness studios, and cleaning companies — so the skill carries that context into future conversations. The goal is that next quarter, I can say "apply the Reva CS Review Brief skill" and you'll do all of this without me re-explaining.

## Prompt 3

I have this month's customer feedback ready for review. Apply my Reva CS Review Brief skill using:

- The new survey responses in this file — Reva\_AI\_Feedback\_Responses\_Q4.xlsx
- Any recent emails in my inbox that look like customer feedback about Reva AI

Deliver the finished brief as a new page in my Notion workspace, in the Anna HQ database, titled "Q4 Customer Feedback Review Brief — Reva." Add a callout at the top noting the sources synthesized, and link back to the previous quarter's brief for comparison.

# Playground for Your Ideas - Turning Imagination into Clickable Demos with Claude

## From Idea to Product Requirements Document (PRD)

### Prompt 1

Please help me write a simple PRD for an app that lets users design their own business cards. The app should allow adding a name, title, and contact details, plus upload a logo or image. It should also allow resizing and moving those elements around on the card.

## **Follow-along: Building your first App Prototype with Artifacts**

### Prompt 1

<copy-paste the PRD main sections: Purpose, Core Features, Nice-to-Haves, and Users created in the previous lecture>

Here's the PRD for my business card app. Please keep this as the reference for the next steps.

Please create a simple first version of the business card app described in the PRD. It should include: a placeholder logo, name, job title, contact details. Keep it inside a card-shaped box with a clean and professional layout.

## **Follow-along: Iterating on the Prototype with your own brand assets**

### Prompt 1

Please replace the placeholder logo with the one attached to this chat.

### Prompt 2

Update the business card to use a navy blue background, white text, and add a thin gold accent line at the bottom.

### Prompt 3

Please change the name and job title to use a bold, modern sans-serif font. Keep the contact details in a smaller, lighter font

### Prompt 4

Please update the card to show: [Your Name], [Your Title], [Your Email], [Your Phone Number].

## **Follow-along: Adding Interactivity (Rotation, Scaling, Layer Control) - part 1**

### Prompt 1

Please update the business card app to include interactive controls for: resizing the logo and text, rotating the logo, changing the layer order (send to front or back). Use simple sliders or buttons for these controls so I can adjust them directly in the preview.

### Prompt 2

Add a color picker so I can change the background instantly.

AND / OR:

Add drag-and-drop so I can move the logo around freely.

## **Follow-along: Adding Interactivity (Rotation, Scaling, Layer Control) - part 2**

### Prompt 1

Let's move the logo to the bottom of the page. Please update the business card app to include interactive controls for: resizing the logo, photo and text, rotating the logo and photo, changing the layer order (send to front or back). Use simple sliders or buttons for these controls so I can adjust them directly in the preview.

### Prompt 2

Please add control for the logo and photo X and Y coordinates on the card.

### Prompt 3

Changing photo and logo size via control panel is not convenient - can we change it by clicking on a corner of the image and then enlarging or minimising it? I also want to change the photo and logo position by dragging the photos, not via slider.

### Prompt 4

Add a color picker so I can change the background instantly. Add the possibility to add a photo in different shapes - circle, rectangle, square.

## Prompt 5

Include an interactive control so that i can change the layer order for images (photo and logo) - send to front and back.

## Follow-along: Adding a Style Presets Dashboard - part 1

### Prompt 1

Add professional style presets dashboard with these categories:

#### Classic Business Styles:

- Corporate Traditional: Conservative, serif fonts, structured layout
- Professional Modern: Clean sans-serif, balanced white space
- Executive Premium: Elegant typography, subtle luxury touches

#### Creative Industry Styles:

- Design Agency Bold: Strong typography, creative layouts, vibrant colors
- Startup Dynamic: Modern, energetic, tech-forward aesthetic
- Creative Freelancer: Artistic, unique layouts, personality-driven

#### Industry-Specific Presets:

- Legal/Finance: Ultra-conservative, trust-building design
- Tech/Software: Clean, modern, innovation-focused
- Healthcare: Professional, approachable, calming colors
- Real Estate: Premium, trustworthy, success-oriented

#### Trendy Modern Styles:

- Minimalist Ultra: Maximum white space, tiny text, huge impact
- Dark Mode Premium: Dark backgrounds, metallic accents
- Gradient Contemporary: Modern color transitions, soft edges

Each preset should instantly transform the entire card while keeping the same content.

## **Follow-along: Adding a Style Presets Dashboard - part 2**

### **Prompt 1**

In the previous version of the artifact - the one in the knowledge base - there were controls for image layering (bring images on top and back) as well as drag and drop function for resizing the images. i don't see these features in the current version - please add

## **Expanding your prompt engineering skills even further: Creating complex prompts**

### **Thinking step by step or chain-of-thought (CoT) prompting (part 2)**

#### **Prompt 1**

I want you to analyze decisions step by step. Here are some examples:

##### **Example 1:**

Problem: 'Should we invest in Project A or Project B?'

Chain of Thought: 'First, compare costs: Project A costs \$50k, Project B costs \$40k. Next, assess timelines: Project A takes 6 months, Project B takes 4 months. Finally, evaluate ROI: Project A's ROI is higher despite the cost. Answer: Project A.'

##### **Example 2:**

Problem: 'Should we expand our team this quarter?'

Chain of Thought: 'First, check current workload: The team is at capacity. Next, assess budget: We can afford to hire. Finally, consider timing: This quarter aligns with project growth. Answer: Yes.'

Now, solve this:

Problem: 'Should we launch Product X in Q2 or Q3?'

## **Follow-along: Summarizing long-form content**

### **Prompt 1**

Summarize the key insights, strategic takeaways, and references from this 3-hour transcript. Include all major points, examples, quotes, trends, leadership insights, product development methodologies, and team collaboration approaches.

## Prompt 2

Divide the transcript into its main sections or topics. For each section, provide a brief title or description summarizing its content.

## Prompt 3

For the section titled "[Section Title]," extract:

- The main points discussed
- Specific examples given
- Notable quotes
- Any industry insights or technical concepts explained

## Prompt 4

Based on the detailed section analysis, provide a summary of strategic takeaways, including:

- Core principles highlighted across the transcript
- Emerging industry trends
- Leadership insights shared
- Product development methodologies mentioned
- Team collaboration approaches discussed

## Prompt 5

List all books, articles, or resources mentioned in the transcript. Group them by topic or theme, if applicable, and include any links or citations provided.

## Prompt 6

Using the section analysis, strategic takeaways, and references, create a comprehensive summary of the transcript. Structure it into the following sections:

1. Detailed Summary Analysis
2. Strategic Takeaways
3. References Section

# Making Sense of Data, the Easy Way, with Claude

## Data Analysis Step 2: Data Exploration

### Prompt 1

I'm analysing B2B sales performance for a computer hardware company. I have 5 CSV files uploaded:

- data\_dictionary.csv (field descriptions)
- accounts.csv (customer information)
- sales\_teams.csv (agent and manager structure)
- sales\_pipeline.csv (8,800 sales opportunities)
- products.csv (product catalog)

Please provide:

1. A summary of each dataset - number of records, key fields, data types
2. How these datasets relate to each other (primary/foreign keys)
3. Data quality assessment - missing values, inconsistencies, format issues
4. Date range covered in the sales pipeline data
5. Any immediate red flags or data concerns I should address

Be specific with numbers and identify the relationships between tables.

### Prompt 2

Please create a data cleaning plan for me.

## Data Analysis Step 4: Extracting Insights - Basic performance metrics (part 1) and (part 2)

### Prompt 1

I'm a new VP of Sales and I've just received our sales pipeline dataset. I need to understand the basic performance metrics of our business before I can make strategic decisions.

Can you help me explore this data to understand:

1. What are our fundamental sales metrics?
2. How is performance distributed across regions and products?
3. What story does this data tell about our business?
4. What key metrics should I track as VP of Sales?

Let's start by examining the sales pipeline data to understand our current performance.

## Prompt 2

Let's calculate other fundamental sales metrics:

1. Deal counts by region
2. Win rates by region and overall
3. Revenue by region and product
4. Average deal sizes
5. Sales cycle lengths

Can you analyze the data and create visualizations that show these key metrics clearly?

## Prompt 3

These metrics are helpful, but I'm seeing some interesting patterns:

1. West has fewer deals but higher revenue - why?
2. Win rates are very similar across regions - what drives revenue differences?
3. What about product performance?
4. Are there seasonal patterns?
5. How do individual agent performances cluster?

Can you help me explore these patterns to understand what's driving our business performance?

# **Follow Along: Preparing for High-Stakes Presentation (part 1) and (part 2)**

## Prompt 1

I'm presenting to our board next week about next year's strategic planning. I've discovered fascinating patterns in our regional sales performance that could significantly impact resource allocation decisions.

Key insights from my analysis:

- West region: \$3.6M revenue (35.7%) with 63.9% win rate
- Central region: \$3.3M revenue (33.4%) with 62.6% win rate
- East region: \$3.1M revenue (30.9%) with 63.0% win rate

The paradox: Win rates are virtually identical, but West generates 16% more revenue than East. Central closes the most deals (1,629) but has middle revenue.

My board audience includes:

- CEO: Wants strategic recommendations and clear action plans
- CFO: Needs financial analysis and ROI projections
- CMO: Prefers visual, engaging presentations
- Board Chair: Values interactive discussion during meetings

I need to create a presentation that:

1. Tells a compelling story about what drives our performance differences
2. Explores strategic implications and recommendations
3. Includes interactive elements for board discussion
4. Looks professional and memorable
5. Supports different communication styles

Can you help me build an executive dashboard and presentation that will engage this audience and drive strategic decisions?

## Prompt 2

That's a great start! Now help me structure this into a compelling narrative flow for the board presentation. I want to:

1. Hook them with the intriguing paradox upfront
2. Walk them through the analysis systematically
3. Build to clear strategic recommendations
4. End with specific next steps and resource allocation proposals

Can you suggest a presentation flow that builds suspense and leads to actionable conclusions? Also, what interactive elements would be most effective for engaging board members during the presentation?

## Prompt 3

The board will definitely ask follow-up questions during the presentation.

Can you create interactive analysis tools that let me explore:

1. Scenario planning: What if we allocated more resources to replicate West's approach?
2. ROI projections: What would it cost to bring East and Central up to West's performance level?
3. Risk analysis: What are the potential downsides of changing our current approach?
4. Risk analysis: What if the market isn't ready for GTK 500?

I need tools that let me drill down into the data during live discussion.

#### Prompt 4

Finally, help me create a clear executive summary and specific recommendations section that includes:

1. The key strategic insight in one compelling sentence
2. Three specific actions we should take in the next year
3. Expected ROI and timeline for each recommendation
4. Success metrics to track progress
5. Resource requirements and budget implications

Make this section action-oriented and decision-ready for the board.

## **How to validate and build confidence in Claude's analysis (part 1) and (part 2)**

#### Prompt 1

For the GTK 500 expansion to Central & East regions - what assumptions are you making about these regions' technical capabilities, existing customer relationships, and sales team readiness for GTK 500? What implementation challenges haven't we considered?

#### Prompt 2

For optimizing the Central region's product mix - show me the competitive analysis, customer segment breakdown, and change management plan that supports shifting from volume to value focus.

#### Prompt 3

You recommended scaling East region operations because of their high deal values. Now play devil's advocate - what are the strongest arguments AGAINST this recommendation? What could go wrong, and why might this be a bad strategic move?

#### Prompt 4

How solid are your three recommendations (GTK 500 expansion, Central optimization, East scaling) if: 1) Economic downturn reduces enterprise spending 40%, 2) Our main competitor launches a superior alternative, 3) We lose our top performers in the East region? Should we still proceed?

# Browser Automation: Let Claude Work in Chrome

## How to Enable Browser Use and See It in Action

### Prompt 1

Go to Google Docs and create a new document called "Q1 Product Roadmap."

Add three sections with headers:

Section 1: Goals

Section 2: Key Features

Section 3: Timeline

Under each section, add 2-3 bullet points with placeholder text.

### Prompt 2

Please review all the comments in this Google Doc. For each comment: read the suggestion, make the appropriate edit to the document, and resolve the comment. Add a reply to each saying what change you made.

## Office Productivity: Calendar, Email & Meeting Prep Automation

### Prompt 1

Please help me close out the day:

1. Review my meetings from today - what action items do I need to follow up on?
2. Check my email - anything urgent from this afternoon that needs a response?
3. Look at my calendar for tomorrow and analyze each meeting:
  - If there's an attachment, tell me what it is and what I should review
  - If it's a new external client meeting, research the company
  - If it's a recurring meeting, note that it's routine
  - Give me specific prep actions for each meeting
4. Create an end-of-day summary with:

- Action items from today
- Urgent emails to handle
- Tomorrow's prep checklist (ordered by meeting time)

## **Creating Reusable Shortcuts: Building and Scheduling**

### **Prompt 1**

Search for news about the EdTech industry from the past week, focusing closely on Singapore and Australia. Visit TechCrunch, The Verge and First Round Review. Find the top 5 most important stories and create a summary document with:

- Headline
- 5-sentence summary
- Link to full article
- Why it matters to my business

Save this as 'Weekly Industry Brief - [Date]' in Google Docs.

## **Creating Reusable Shortcuts: Managing Site Access Permissions**

### **Prompt 1**

Search for news about the EdTech industry from the past week, focusing closely on Singapore and Australia. Visit TechCrunch, The Verge and First Round Review. Find the top 5 most important stories and create a summary document with:

- Headline
- 5-sentence summary
- Link to full article
- Why it matters to my business

ALWAYS ask to allow site level permissions on the websites above.

Save this as 'Weekly Industry Brief - [Date]' in Google Docs.

# Voice Instructions: Teaching Claude Your Workflow Step-by-Step

## Voice Instructions: Testing and Scheduling Your Automated Workflow

### Prompt 1

- Target startup spreadsheet URL: The Google Sheets URL containing the list of target companies
- Number of companies to process: How many companies to check (default is 5)
- Service offerings spreadsheet tab: The name of the tab containing service descriptions

</inputs>

You are performing daily business development research for B2B outreach. Here's the workflow:

#### **\*\*Step 1: Access and Review Target Companies\*\***

- Open the target startup spreadsheet at the provided URL
- Navigate to the "Leads" tab
- Identify companies where the "Done status" column (column D) is empty
- Select the specified number of companies to process (starting from the top of the list)

#### **\*\*Step 2: Review Service Offerings\*\***

- Switch to the "Service Offer" tab in the same spreadsheet
- Read and understand the complete list of services offered
- These services describe what problems are solved for target clients

#### **\*\*Step 3: Find Target Contact\*\***

- For each selected company, click on the LinkedIn Sales Navigator company link in column A
- Once on the company page, click "All employees" to view the employee list
- Identify and select the PRIMARY contact - prioritize in this order:
  1. Founder or Co-Founder

2. CEO or C-level executive
3. Someone with "Product" in their title

- Click on the identified contact's profile
- Click "View LinkedIn profile" to access their full LinkedIn profile

**\*\*Step 4: Record Contact Information\*\***

- Copy the LinkedIn profile URL
- Paste this URL into column B (Founder/Lead contact) for the relevant company row

**\*\*Step 5: Analyze Recent Posts\*\***

- On the contact's LinkedIn profile, click "Show all posts" or navigate to their recent activity
- Review 3-5 of their most recent posts
- For each post, click "...more" or "see more" to read the full content

**\*\*Step 6: Identify Themes and Document Findings\*\***

- Analyze the posts to identify themes that relate to the service offerings
- Look for challenges, initiatives, or topics that connect to what you offer
- When you find a relevant theme, document it in column C (Themes & message ideas) in ONE SINGLE cell using this exact format:

...

Theme 1: [Name of the theme]

Quote

Link to the relevant post: [LinkedIn post link]

...

In case you found several themes and posts for a company, ALWAYS include them in the SAME SINGLE cell in column C.
